

New Yamaha Outboard Master Technicians

Coltons Point Marina
301.769.3121

Yamaha Master Technician certification is the prestigious status earned by dedicated, hardworking, and experienced technicians. To earn the title, experienced marine technicians must successfully complete six week-long courses after which they are eligible to take the Master Technician exam. Technicians who have achieved Yamaha's Master Technician status have worked hard to hone their knowledge of Yamaha outboard engine operating systems, proper installation, service and maintenance procedures plus troubleshooting skills. Technicians who have qualified to take the Master Technician Certification test will attest how challenging the test really is. We would like to recognize and congratulate our most recent technicians, who earned Master Technician status in October 2015.

*"Education is defined as obtaining the ability to learn anything.
Constantly educate yourself formally and by observation.
If you watch things with an open mind, you will see what to do!"*

Ben Speciale
President, Yamaha Marine Group
